# Product Overview

**Vertical Shadings are a revolutionary new window covering** that will enhance any décor in your home and will beautifully complement our Horizontal Alternative Shades. Its innovative and unique design combines the best features and functionality of horizontal, vertical, and sunscreen shades into a single luxurious shading product. By incorporating both transparent and opaque fabric sections, these shadings allow for greater control of light and mood while maximizing your view to the outdoors or your privacy. The transparent and opaque fabric sections of the shade repeat by traversing behind each other giving you the following optional settings: light filtering, translucent, room darkening or semi-room darkening. **Unlike vertical blinds, Vertical Shadings also allow you to raise the blinds like a roller shade while giving you a completely open view to the exterior. An excellent feature especially for homes with patio doors, garden doors and french doors.** Vertical Shadings are available in a wide assortment of colours, opacities and textures to satisfy the needs and tastes of the most discerning consumers.

## Features

- 12 sku's in an assortment of colours, textures and opacities combines functionality and aesthetics.
- Offers maximum control of the sun's glare and harmful UV rays while maintaining optimal light control and intimacy.
- 100% polyester wide width fabrics.
- Four different settings for maximum light control, light filtering, semi-room darkening, room darkening and open position.
- Vertical shadings allow you to raise the blinds so that you have a completely open view of the outdoors.
- \* Butt to butt blinds available. Specialty applications not available.

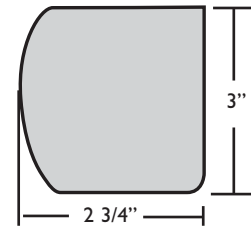

### • Product Specifications:

- Minimum width of shade 23 3/4"
- Maximum width of shade 108"
- Minimum Height of shade 30"
- Maximum Height of shade 102"
- Please call customer service if you have applications that exceed maximum width for assistance.

### • Headrail dimension:

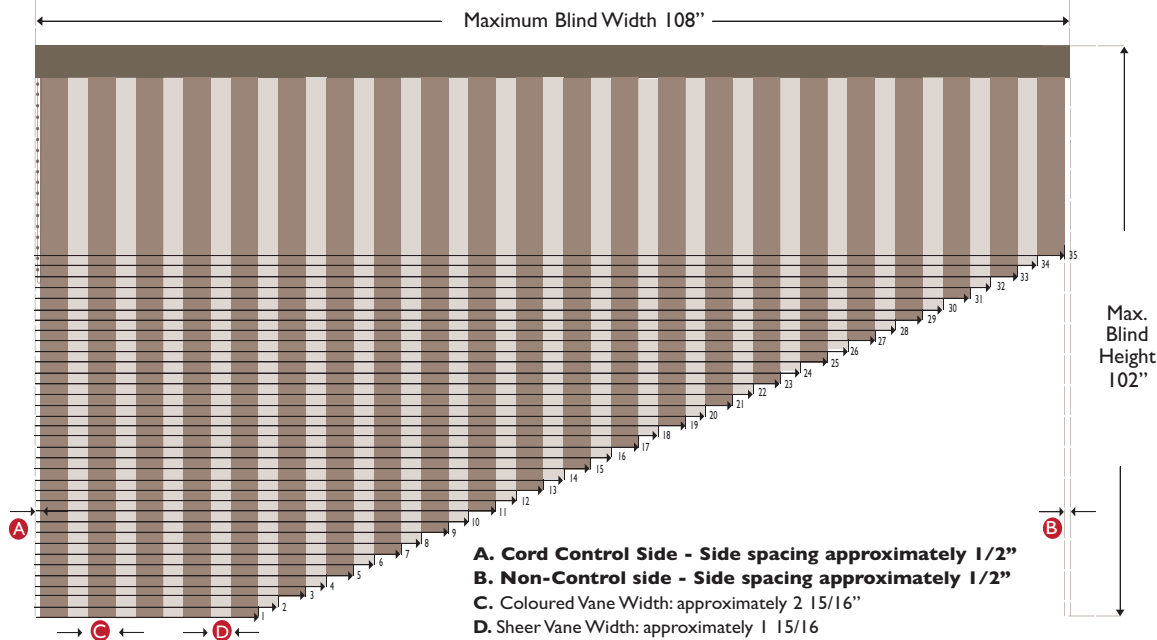

3" high x 2 3/4" deep  
(headrail is available with matching fabric insert at NO CHARGE).

- **Warranty:** Lifetime limited Warranty on all moving components and hardware. 5 years on fabric (100% Polyester).

33	99 3/4"	Solid
34	102 1/2"	Sheer
35	104 1/2"	Solid
36	107 3/8"	Sheer

### Notes:

- Fabric is approximately 1/2" shorter on each side as compared to the headrail.
- Inside Mounts: depending on the blind width, the last vane on the non-control side will either be solid or sheer, partial or full (see chart and illustration above).
- Outside Mounts: will allow you to choose the optimum width for your non-control side vane preference: solid versus sheer (see chart and illustration above). On outside mounts, we could possibly adjust the finished size by approximately 1/2" to achieve optimum vane size.
- For sizes that fall in between the optimum width sizes above, vanes will be reduced in size accordingly on the non-control side.
- **Woven Naturals Fabric - Maximum height 72".**

# Design Advantage

UNIQUE  
NEW  
PRODUCT

Design advantages with all the different appearances of the shade shown.

**Room Darkening Position** - Gives you maximum privacy and protection from ultraviolet light.

**Light Filtering Position**

**Semi-Room Darkening Position**
